DETAILED ACTION***Double Patenting***

Claims 1 – 3, 6 and 20 – 24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 30 of U.S. Patent No. 5,985,214 A (Stylli et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other because the pending claims appear to be directed to the identical apparatus. For example, Stylli et al. indicate that their disclosed apparatus can process at least 100,000 addressable wells containing chemical samples in a 24 hour period (see col. 3, lines 8 – 19; col. 9, line 65 – col. 11, line 13; col. 18, lines 33 – 67). Stylli et al. do recite in claim 20 that their apparatus can process samples at a rate of about 100,00 samples per day. Stylli et al. do teach the incorporation of a sample distribution module, which can either aspirate or dispense sample solutions (see col. 12, lines 4 – 61; col. 62, lines 48 – 54). Stylli et al. do recite in claim 1 that their apparatus comprises a sample distribution module comprising a liquid handler, which can both aspirate and dispense sample solutions.

Response to Arguments

Applicant's arguments with respect to claims 1 – 3, 6 and 20 – 24 have been considered but are moot in view of the new ground(s) of rejection.
